

## Product Sheet

# ZIPP

**Manual tong stapler for setting end pieces when processing endless zippers Processing endless plastic zippers with chain widths of 4 and 5 mm.**

Manual tong stitcher for setting end pieces when processing endless zippers up to 5 mm chain width. This tong stitcher rationalizes the time-consuming work with end piece tongs, where end pieces from each stitching have to be inserted individually. It is also a cost-effective alternative to the use of hopper systems, thus bridging the gap between the two variants. Suitable for the textile processing industry, medical supply stores and tailoring companies.

## Techn. Details: ZIPP

|                  |  |
