

Product Sheet

ZIPP LF.CF.H

Pneumatic tong stapler for setting end pieces when processing endless plastic zippers with a chain width of 4 and 5 mm.

Pneumatic stapler for setting end pieces when processing plastic zippers with a chain width of 4 and 5 mm. Elevated device position, which creates space for better handling of the stapler and the integration of the holding block for pulling on the zipper slider. The device is mounted on an aluminum plate. Also included are a foot pedal, pressure reducer, hoses and fittings, as well as a centering device that ensures the zipper is inserted exactly in the middle. 3 versions of the holding bracket are optionally available.

Techn. Details: ZIPP LF.CF.H
